Understanding Global Cancer Disparities: The Role of Social Determinants from System Dynamics Perspective, by Faustine Williams, Nancy Zoellner, Peter S. Hovmand		1
1	Introduction	2
1.1	Aim	2
2	Approach and Methods	2
2.1	Systematic Review Process	2
3	Results	3
3.1	Global Cancer Disparities Concept Model Scope and Subsystems	3
3.2	A System Dynamics Framework and Feedback Structure for Global Cancer Disparities	4
4	Discussion	6
4.1	Children, Adult and Overall Population Health	6
4.2	Pollution	7
4.3	Quality of Healthcare Delivery	8
4.4	Quality of Neighborhood and Built Environment	8
4.5	Social Norms and Community Cohesiveness	9
4.6	Literacy Level	9
5	Conclusions	9
Transdisciplinary Approaches in the Development of Novel Therapies for the Treatment of Fibrotic Diseases, by Louise Hecker		14
1	Introduction	14
2	Aging, Oxidative Stress, and Fibrosis	15
3	Development of Age-relevant Animal Models for Pre-clinical Testing	15
4	Novel Pro-fibrotic Mechanisms in Age-associated Pathological Fibrosis	16
5	Selective Nox4 inhibitors have not been previously identified	16
6	Transdisciplinary Approaches to Drug Discovery and Pre-clinical Development	17
7	Conclusion	17
A Hyperspectral Signature Method for Identifying E. coli: Impact on Public Health, by Timothy M. Horton, Matthew Kay, A. Ertas, D. Tate		20
1	Introduction	20
2	Microbiology Introduction	21
3	Materials and Methods	23
3.1	Data Set	23
3.2	Target Environment	23
3.3	Developing Truth	23

4 Spectral Angle Mapping	24
4.1 Spectral Correlation Mapping	25
5 Implementation Details	26
6 Results and Discussion	28
7 Conclusions	28
8 Acknowledgements	28
Thinking Transdisciplinarily on a Country Path: Rooting Enquiry and Pedagogy by Learning from Heidegger and the Zhongyong, by Paul Gibbs	33
1 Introduction	33
2 Rooting a Chinese Onto-cosmology	34
3 Zhongyong	35
4 Heidegger on Thinking and Releasement	37
5 Can A Conversation along the Path Change Our Stance on Thinking?	39
Technological Singularity – The Dark Side, by Basarab Nicolescu	43
1 Technological Singularity	43
2 Conclusion	47
The Many Ways of Thinking: Transdisciplinary Skills, by Robert S. Block	49
1 Introduction	49
2 U.S. Patent Office	49
3 Many Ways of Thinking	50
4 How We Think vs. What We Think	50
5 Think on Demand	50
6 Thinking Exercises	51
7 Science Fiction Thinking	51
8 Management Thinking	51
9 Napoleon Bonaparte	51
10 Railroad Transportation	52
11 Status Quo Thinking	52

12 Thoughts on a University without Classrooms or Lectures	52
12.1 How Will Education Without Classrooms Or Lectures Work?	53
12.1.1 Solution Based Learning (SBL)	53
12.1.2 Immersion Based Reality (IBR)	53
13 Conclusion	53
Transdisciplinary Trans-Sector Integration in Education: Convergence, by Atila Ertas	55
1 Introduction	55
2 Need for Transdisciplinary Graduate Education	56
2.1 A-STEM-H Transdisciplinary Domain	58
3 Proposed Transdisciplinary Graduate Education	59
3.1 Proposed Transdisciplinary Ph.D. Curriculum	60
3.1.1 Transdisciplinary Core Courses	60
3.1.2 Supplementary Courses	62
3.1.3 Complementary Courses	62
4 Discussions	62
5 Conclusion	66
Transdisciplinary Science Methodology as a Necessary Condition in Research and Education, by Orhan Güvenen	69
1 Introduction	69
2 Transdisciplinary Science Methodology , Information Systems, Big Data and Information Distortion Interactions	71
3 Anticipative Analysis and Transdisciplinary Science Methodology	72
4 Transdisciplinary science methodology in education	74
5 Transdisciplinary science methodology and ethics	75
6 Conclusions	77
Steps to an Ecology of Knowing, and to Teaching Embodied Transdisciplinary Hermeneutics, by Hans Dieleman	79
1 The Mind as Ecology	79
2 The Embodied/Embedded Mind	80
3 The Mind and Our Ways of Knowing	81
4 The Importance of Transdisciplinary Hermeneutics	82
5 Steps to Teaching Embodied Transdisciplinary Hermeneutics	85
5.1 The First Step: Creating a Learning Environment of Being-in-the-World	85
5.2 The Second Step: Training the Body to be an Organ of Perception	85

5.3	The Third Step: Engaging Students in Phenomenological Ways of Knowing	86
5.4	The Fourth Step: Facilitating Students to Engage in Reflective Practice	87
5.5	Step 5: Facilitating Students to Engage in Dialogue	87
5.6	The Sixth Step: Facilitating Students to Learn in Analytical and Conceptual Ways	88
5.7	The Seventh Step: Seeing Education as a Dispositive of form and Content	89
6	Conclusions	89
	Cosmodern Education for a Sustainable Development: a Transdisciplinary and Biomimetic Approach form the Big History, by Javier Collado Ruano	93
1	Sustainable Development Goals: an Introduction	93
2	Transdisciplinary Methodology: Linking Education with Sustainability	94
3	A Brief Summary of the Big History: The Human Co-evolution in Gaia	95
4	Biomimicry: A Sustainable and Resilient Meta-Model	97
5	Cosmodern Education for a Sustainable Development	101
6	Inner Education in a Universe of Emotions	106
7	Spiritual and Religious Dimension of the Human Condition	107
8	Educating to Live in the Paradigm of Cosmodernity	109
9	Final Conclusions for the Future We Want	113
